

Made in Australia

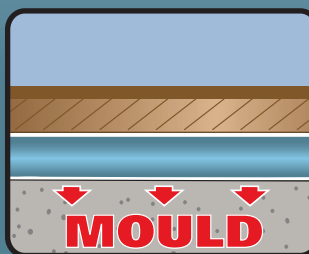

Roberts lamilay XP underlay is a superior quality, closed cell physically cross linked polyolefin foam, with twin skin and plastic film.

Includes adhesive strip and 75mm overlap film for linking multiple rolls and providing excellent moisture protection.

2mm thick foam cushions flooring and provides underfoot comfort.

Mould and mildew resistant.

Item# 70-800

## Giving floors the necessary moisture protection & sound absorption

In the growing market of laminate and engineered hardwood floating floors, the biggest concerns are noise/sound and water/mould damage.

Roberts underlayments are engineered to meet the highest standards in moisture protection, comfort and even minor-sub floor corrections.
